PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

National Education Policy-2020
Common Minimum Syllabus for all U.P. State Universities/ Colleges
SUBJECT: STATISTICS

Name	Designation	Affiliation
Steering Committee		
Mrs. Monika S. Garg, (I.A.S.) Chairperson Steering Committee	Additional Chief Secretary	Dept. of Higher Education U.P., Lucknow
Prof. Poonam Tandan	Professor, Dept. of Physics	Lucknow University, U.P.
Prof. Hare Krishna	Professor, Dept. of Statistics	CCS University Meerut, U.P.
Dr. Dinesh C. Sharma	Associate Professor, Dept. of Zoology	K.M. Govt. Girls P.G. College Badalpur, G.B. Nagar, U.P.
Supervisory Committee-Science Faculty		
Dr. Vijay Kumar Singh	Associate Professor, Dept. of Zoology	Agra College, Agra
Dr. Santosh Singh	Dean, Dept. of Agriculture	Mahatma Gandhi Kashi Vidhyapeeth, Varanasi
Dr. Baby Tabussam	Associate Professor, Dept. of Zoology	Govt. Raza P.G. College Rampur, U.P.
Dr. Sanjay Jain	Associate Professor, Dept. of Statistics	St. John's College, Agra

Syllabus Developed by:

S.No.	Name	Designation	Department	College/University
1.	Prof. Sunil Kumar Pandey	Retd. Professor	Statistics	Lucknow University, Lucknow
2.	Dr. Rajiv Saksena	Analyst cum Programmer	Statistics	Lucknow University, Lucknow
3.	Mr. Digvijay Pal Singh	Associate Professor	Statistics	Agra College, Agra

National Education Policy-2020

Common Minimum Syllabus for all U.P. State Universities

Year-wise Titles of the Papers in B.A./B.Sc. (Statistics)

Year	Paper	Course Code	Paper Title	Theory/Practical	Credits
I	I	B060101T	Descriptive Statistics (Univariate) and Theory of Probability	Theory	04
	II	B060102P	Descriptive Data Analysis Lab (Univariate)	Practical	02
	III	B060201T	Descriptive Statistics (Bivariate) and Probability Distributions	Theory	04
	IV	B060202P	Descriptive Data Analysis Lab (Bivariate)	Practical	02
II	I	B060301T	Theory of Estimation and Sampling Survey	Theory	04
	II	B060302P	Sampling Survey Lab	Practical	02
	III	B060401T	Testing of Hypothesis and Applied Statistics	Theory	04
	IV	B060402P	Test of Significance and Applied Statistics Lab	Practical	02
III	I	B060501T	Multivariate Analysis and Non-parametric Methods	Theory	04
	II	B060502T	Analysis of Variance and Design of Experiment	Theory	04
	III	B060503P	Non-paramertic Methods and DOE Lab	Practical	02
	IV	B060601T	Statistical Computing and Introduction to Statistical Software	Theory	04
	V	B060602T	Operations Research	Theory	04
	VI	B060603P	Operations Research and Statisical Computing Lab	Practical	02

:: Subject Prerequisties::

To study this subject a student must had the subject(s) Mathematics in class 12th

:: Programme Outcomes (POs) ::

Students having Degree in B.Sc. (with Statistics) should have knowledge of different concepts and fundamentals of Statistics and ability to apply this knowledge in various fields of industry. They may pursue their future career in the field of Statistics and Research.

:: Programme Specific Outcomes (PSOs) ::

After completing B.Sc. (with Statistics) the student should have

- Knowledge of different concepts, principles, methodologies and tools (skills) of Statistics.
- Ability to collect, tabulate, represent graphically, analyze and interpret data/information by using appropriate statistical tools.
- Ability to identify and solve a wide range of problems in real life/industry related to Statistics.
- Familiarity with computational techniques and statistical software including programming language (e.g. R) for mathematical and statistical computation.
- Capability to use appropriate statistical skills in interdisciplinary areas such as finance, health, agriculture, government, business, industry, telecommunication and bio-statistics.
- Ability to compete with industrial/private sector demand in the field of data analysis, marketing survey, etc. in professional manner and pursue their future career in the field of Statistics.
- Ability to develop original thinking for formulating new problems and providing their solutions. As a result, they will be able to pursue higher studies or research in the field of Statistics.

:: List of All Papers in First Year ::

Programme	Year	Paper	Course Title		Credits	Teaching Hours
Certificate in Descriptive Statistics and Probability	I	I	Theory(B060101T) Descriptive Statistics (Univaritate) and Theory of Probability	Part-A: Descriptive Statistics (Univariate)	04	60
				Part-B: Theory of Probability		
		II	Practical(B060102P): Descriptive Data Analysis Lab (Univariate)		02	60
		III	Theory(B060201T) Descriptive Statistics (Bivariate) and Probability Distributions	Part-A: Descriptive Statistics (Bivariate)	04	60
				Part-B: Probability Distributions		
		IV	Practical(B060202P): Descriptive Data Analysis Lab (Bivariate)		02	60

:: List of All Papers in Second Year ::

Programme	Year	Paper	Course Title		Credits	Teaching Hours
Diploma in Mathematical & Applied Statistics with Statistical Inference	II	I	Theory(B060301T) Theory of Estimation and Sampling Survey	Part-A: Sampling Distributions and Theory of Estimation	04	60
				Part-B: Sampling Survey		
		II	Practical(B060302P): Sampling Survey Lab		02	60
		III	Theory(B060401T) Testing of Hypothesis and Applied Statistics	Part-A: Testing of Hypothesis and Tests of Significance	04	60
				Part-B: Applied Statistics		
		IV	Practical(B060402P): Test of Significance and Applied Statistics Lab		02	60

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

:: List of All Papers in Third Year ::

Programme	Year	Paper	Course Title	Credits	Teaching Hours
B.A./B.Sc.	III	I	Theory-I(B060501T) Multivariate Analysis and Non-parametric Methods	04	60
		II	Theory-II(B060502T) Analysis of Variance and Design of Experiment	04	60
		III	Practical(B060503P): Non-paramertic Methods and DOE Lab	02	60
		IV	Theory-III(B060601T) Statistical Computing and Introduction to Statistical Software	04	60
		V	Theory-IV(B060602T) Operations Research	04	60
		VI	Practical(B060603P): Operations Research and Statisical Computing Lab	02	60

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

Programme/Class: **Certificate**	Year: **First**	**Paper: First**
Subject: **STATISTICS**		
Course Code: -**B060101T**	Course Title: **Descriptive Statistics (Univariate) and Theory of Probability**	

Course outcomes:

After completing this course a student will have:

- ✓ Knowledge of Statistics, its scope and importance in various fields.
- ✓ Ability to understand concepts of sample vs. population and difference between different types of data.
- ✓ Knowledge of methods for summarising data sets, including common graphical tools (such as boxplots, histograms and stemplots). Interpret histograms and boxplots.
- ✓ Ability to describe data with measures of central tendency and measures of dispersion.
- ✓ Ability to understand measures of skewness and kurtosis and their utility and significance.
- ✓ Ability to understand the concept of probability along with basic laws and axioms of probability.
- ✓ Ability to understand the terms mutually exclusive and independence and their relevance.
- ✓ Ability to identify the appropriate method (i.e. union, intersection, conditional, etc.) for solving a problem.
- ✓ Ability to apply basic probability principles to solve real life problems.
- ✓ Ability to understand the concept of random variable (discrete and continuous), concept of probability distribution.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: 35

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
	Part-A: Descriptive Statistics (Univariate)	
I	Introduction to Statistics, Meaning of Statistics, Importance of Statistics, Scope of Statistics in Industry, Introduction and contribution of Indian Scholars in Statistics. Concept of Statistical population, Attributes and Variables (Discrete and Continuous), Different types of scales – Nominal, Ordinal, Ratio and Interval, Primary data – designing a questionnaire and schedule, collection of primary data, checking their consistency, Secondary data.	**06**
II	Presentation of data : Classification, Tabulation, Diagrammatic & Graphical Representation of Grouped data, Frequency distributions, Cumulative frequency distributions and their graphical representations, Histogram, Frequency polygon and Ogives. Stem and Leaf plot, Box Plot.	**08**
III	Measures of Central tendency and Dispersion and their properties, Merits and Demerits of these Measures.	**10**
IV	Moments and Factorial moments, Shephard's correction for moments, Measures of Skewness and Kurtosis and their significance, Measures based on quartiles.	**06**

Part-B: Theory of Proability		
V	Random experiment, Trial, Sample point and Sample space, Events, Operations of events, Concept of equally likely, Mutually exclusive and Exhaustive events. Definition of Probability: Classical, Relative frequency and Axiomatic approaches.	**04**
VI	Discrete Probability Space, Properties of Probability under Set Theory Approach, Independence of Events, Conditional Probability, Total and Compound Probability theorems, Bayes theorem and its Applications.	**09**
VII	Random Variables – Discrete and Continuous, Probability Mass Function (pmf) and Probability density function (pdf), Cumulative distribution function (cdf). Joint distribution of two random variables, Marginal and Conditional distributions, Independence of random variables.	**08**
VII	Expectation of a random variable and its properties, Expectation of sum of random variables and product of independent random variables, Conditional expectation and related problems. Moments, Moment generating function (m.g.f.) & their properties, Continuity theorem for m.g.f. (without proof). Chebyshev's inequality, Weak law of large numbers for a sequence of independently and identically distributed random variables and their applications. (Statement Only)	**09**

https://nptel.ac.in/course.html
https://www.edx.org/search?q=statistics
https://www.coursera.org/search?query=statistics&

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods:
Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Assessment and Presentation of Assignment	**(05 marks)**
Class Test-I (Objective Questions)	**(04 marks)**
Class Test-II (Descriptive Questions)	**(04 marks)**
Class Test-III (Objective Questions)	**(04 marks)**
Class Test-IV (Descriptive Questions)	**(04 marks)**
Class Interaction	**(04 marks)**

Course prerequisites: To study this course, a student must have the subject **Mathematics/Elementary Mathematics in class 12th.**

Suggested equivalent online courses:
……..

Further Suggestions:
……..

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

Programme/Class: **Certificate**	Year: **First**	**Paper: Second**
Subject: **STATISTICS**		
Course Code: -**B060102P**	Course Title: **Descriptive Data Analysis Lab (Univariate)**	

Course outcomes:

After completing this course a student will have:

- ✓ Ability to represent/summarise the data/information using appropriate Graphical methods including common graphical tools (such as boxplots, histograms and stemplots) and also to draw inferences from these graphs
- ✓ Acquire the knowledge to identify the situation to apply appropriate measure of central tendency as per the nature and need of the data and draw meaningful conclusions regarding behavior of the data.
- ✓ Acquire the knowledge to identify the situation to apply appropriate measure of dispersion as per the nature and need of the data and draw meaningful conclusions regarding heterogeneity of the data.
- ✓ Ability to measure skewness and kurtosis of data and define their significance.
- ✓ Acquire the knowledge to compute conditional probabilities based on Bayes Theorem .

Credits: **02**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **0-0-4**.

	List of Practicals	No. of Lectures
	1. Problems based on graphical representation of data by Histogram, Frequency polygons, frequency curves and Ogives, Stem and Leaf Plot, Box Plot. 2. Problems based on calculation of Measures of Central Tendency. 3. Problems based on calculation of Measures of Dispersion. 4. Problems based on calculation of Moments, Measures of Skewness and Kurtosis. 5. Computation of conditional probabilities based on Bayes theorem	**60**

Suggested Readings:
As suggested for paper code B060101T.

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods: (25 Marks)

Continuous Internal Evaluation shall be based on Practical File/Record, Class Activities and Overall performance. The marks shall be as follows:

Practical File/Record	**(05 marks)**
Field Activity*	
(a) Theme/Objective of the Activity	**(02 marks)**
(b) Report Preparation#	**(08 marks)**
(c) Presentation&	**(05 marks)**
Class Interaction	**(05 marks)**

Suggested Practical Examination Evaluation Methods: (75 Marks)

Practical Examination Evaluation shall be based on Viva-voce and Practical Exercises. The marks shall be as follows:

Practical Exercise (Major%) 01 x 25 Marks	**25 Marks**
Practical Exercise (Minor%) 02 x 15 Marks	**30 Marks**
Viva-voce	**20 Marks**

% There shall be 04-05 Practical Exercises in Examination comprising 01 as Major (Compulsory) and 03-04 as Minor (Students have to attend any 02).

Course prerequisites: To study this course, a student must have opted/passed the **paper code B060101T.**

Suggested equivalent online courses:
……..

Further Suggestions:
In practical classes a series of lectures for MS-Excel may be organized for Students and they may be asked to use it to perform practical problems assigned to them.

*A minor project/survey with application of techniques studied in B060101T.
e.g.
It may be a survey based study (with sample size not more than 50 and 10 questions) addressing the local area on social, economical, educational, occupational, marital, behavioural issues; knowledge, attitude, practices towards various aspects; industrial, pollution, traffic, etc. status.
A student have to develop a questionnaire then collect, classify and tabulate the data. Thereafter, represent the data graphically and/or calculate some descriptive statistics (univariate) and make some inferences (if possible).

#Report may be hand-written or in typed format. Headings of the report may be decided by the supervisor.

& Presentation may be verbal or by using ppt etc.

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

Programme/Class: **Certificate**	Year: **First**	**Paper: Third**
Subject: **STATISTICS**		
Course Code: -**B060201T**	Course Title: **Descriptive Statistics (Bivariate) and Probabiity Distributions**	

Course outcomes:

After completing this course a student will have:

- ✓ Knowledge of the method of least squares for curve fitting to theoretically describe experimental data with a function or equation and to find the parameters associated with the model.
- ✓ Knowledge of the concepts of correlation and simple linear regression and Perform correlation and regression analysis.
- ✓ Ability to interpret results from correlation and regression.
- ✓ Ability to compute and interpret rank correlation. .
- ✓ Ability to understand concept of qualitative data and its analysis.
- ✓ Knowledge of discrete distributions. Discuss appropriate distribution negative binomial, Poisson, etc. with their properties and application of discrete distribution models to solve problems.
- ✓ Knowledge of continuous distributions. Discuss the appropriate distribution (i.e. uniform, exponential, normal, etc.) with their properties and application of continuous distribution models to solve problems.
- ✓ Knowledge of the formal definition of order statistics, derive the distribution function and probability density function of the r^{th} order statistic and joint distribution of r^{th} and s^{th} order statistics.
- ✓ Ability to identify the application of theory of order statistics in real life problems.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks:**35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
	Part-A: Descriptive Statistics (Bivariate)	
I	Bivariate data, Principles of least squares, Most plausible values, Meaning of curve fitting, Fitting of straight line, parabola, logarithmic, power curves and other simple forms by method of least squares.	**08**
II	Bi-Variate frequency table, Correlation, Types of relationships, Scatter diagram, Karl-Pearson's Correlation Coefficient and its properties.	**08**
III	Rank correlation and its coefficient (Spearman and Kendall Measures) Regression analysis through both types of regression equations for X and Y variables.	**08**
IV	Attributes: Notion and Terminology, Contingency table, Class frequencies and Ultimate class frequencies, Consistency, Association of Attributes, Independence, Measures of association for 2X2 table, Chi-square, Karl Pearson's and Tschuprow's Coefficient of Association.	**06**

Part-B: Probability Distributions		
V	Discrete Probability Distributions: Binomial distribution, Poisson distribution (as limiting case of Binomial distribution), Hypergeometric, Geometric and Negative Binomial, Uniform and Multinomial distributions, fitting of Binomial, Poisson and Uniform distributions.	**10**
VI	Continuous Probability Distributions: Exponential, Gamma, Beta distributions. Cauchy, Laplace, Pareto, Weibull, Log normal distributions.	**10**
VII	Normal distribution and its properties, Standard Normal variate, Normal distribution as limiting case of Binomial distribution, fitting of Normal distribution.	**06**
VIII	Order Statistics, Distributions of minimum, r^{th} and maximum order statistic, Joint distribution of r^{th} and s^{th} order statistics (in continuous case), Distribution of sample range & sample median for uniform and exponential distributions.	**04**

Programme/Class: **Diploma**	Year: **Second**	**Paper: First**
Subject: **STATISTICS**		
Course Code: -**B060301T**	Course Title: **Theory of Estimation and Sampling Survey**	

Course outcomes:

After completing this course a student will have:

- ✓ Knowledge of the concept of Sampling distributions.
- ✓ Ability to understand the difference between parameter & statistic and standard error & standard deviation.
- ✓ Knowledge of the sampling distribution of the sum and mean.
- ✓ Ability to understand the t, f and chi-square distribution and to identify the main characteristics of these distributions.
- ✓ Knowledge of the concept of Point and Interval Estimation and discuss characteristics of a good estimator.
- ✓ Ability to understand and practice various methods of estimations of parameters.
- ✓ Ability to understand the concept of sampling and how it is different from complete enumeration.
- ✓ Knowledge of various probability and non-probability sampling methods along with estimates of population parameters
- ✓ Ability to identify the situations where the various sampling techniques shall be used.
- ✓ Knowledge of sampling and non-sampling errors.
- ✓ Knowledge of regression and ratio methods of estimation in simple random sampling (SRS).

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: 35

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
	Part-A: Sampling Distributions and Theory of Estimation	
I	Sampling Distributions: The concept of sampling distribution, Parameter, Statistic and Standard error. The sampling distribution for the sum of independent random variables of Binomial, Poisson and Normal distribution.	**04**
II	Central limit theorem, sampling distribution of Z. Sampling distribution of t, f, and chi-square without derivations, Simple properties of these distributions and their interrelationship.	**09**
III	Point estimation: Characteristics of a good estimator: Unbiasedness, consistency, sufficiency and efficiency. Problems and examples, Interval estimation.	**08**
IV	Method of Maximum Likelihood and properties of maximum likelihood estimators (without proof), Method of minimum Chi-square. Method of least squares and methods of moments for estimation of parameters	**09**

Part-B: Sampling Survey		
V	Sampling vs. Complete enumeration: Sampling units and Sampling frame, Precision and efficiency of estimators, Simple Random sampling with and without replacement, Use of random number tables in selection of simple random sample, Estimation of population mean and proportion, Derivation of expression for variance of these estimators, Estimation of variances, Sample size determination.	**08**
VI	Stratified random sampling, Problem of allocation, proportional allocation, optimum allocation. Derivation of the expressions for the standard error of the usual estimators when these allocations are used, Gain in precision due to Stratification, Role of sampling cost in the sample allocation, Minimization of variance for fixed cost.	**08**
VII	Systematic Sampling: Estimation of Population mean and Population total, standard errors of these estimators Two stage sampling with equal first stage units: Estimation of Population mean and its variance	**08**
VIII	Regression and ratio methods of estimation in simple random sampling, Cluster sampling with equal clusters, Estimators of population mean and their mean square errors.	**06**

https://www.coursera.org/search?query=statistics&

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Assessment and Presentation of Assignment	**(05 marks)**
Class Test-I (Objective Questions)	**(04 marks)**
Class Test-II (Descriptive Questions)	**(04 marks)**
Class Test-III (Objective Questions)	**(04 marks)**
Class Test-IV (Descriptive Questions)	**(04 marks)**
Class Interaction	**(04 marks)**

Course prerequisites: To study this course, a student must have opted/passed the **paper code B060201T.**

Suggested equivalent online courses:
……..

Further Suggestions:
……..

Programme/Class: **Diploma**	Year: **Second**	**Paper: Second**
Subject: **STATISTICS**		
Course Code: **-B060302P**	Course Title: **Sampling Techniques Lab**	

Course outcomes:

After completing this course a student will have:

1. Ability to draw a simple random sample with the help of table of random numbers.
2. Ability to estimate population means and variance in simple random sampling.
3. Ability to deal with problems based on Stratified random sampling for population means (proportional and optimum allocation).
4. Ability to deal with problems based on Systematic random sampling
5. Ability to deal with problems based on two stage sampling
6. Ability to deal with problems based on Ratio and regression estimation of population mean and total.

Credits: **02**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **0-0-4**.

	Topic	No. of Lectures
	1. Problems based on drawing a simple random sample with the help of table of random numbers. 2. Problems based on estimation of population means and variance in simple random sampling. 3. Problems based on Stratified random sampling for population means (proportional and optimum allocation). 4. Problems based on Systematic random sampling 5. Problems based on two stage sampling 6. Problems based on Ratio and regression estimation of population mean and total.	**60**

Suggested Readings:
As suggested for paper code B060301T.

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on Practical File/Record, Class Activities and Overall performance. The marks shall be as follows:

Practical File/Record	**(05 marks)**
Assignment based on B060301T	**(05 marks)**
Case Study* based on B060301T	**(10 marks)**
Class Interaction	**(05 marks)**

Suggested Practical Examination Evaluation Methods: (75 Marks)

Practical Examination Evaluation shall be based on Viva-voce and Practical Exercises. The marks shall be as follows:

Practical Exercise (Major%) 01 x 25 Marks	**25 Marks**
Practical Exercise (Minor%) 02 x 15 Marks	**30 Marks**
Viva-voce	**20 Marks**

% There shall be 04-05 Practical Exercises in Examination comprising 01 as Major (Compulsory) and 03-04 as Minor (Students have to attend any 02).

Course prerequisites: To study this course, a student must have opted/passed the **paper code B060301T.**

Suggested equivalent online courses:
……..

Further Suggestions:
In practical classes a series of lectures for any statistical software may be organized for students and they may be asked to use it to perform practical problems assigned to them.

*Student may be asked to prepare a case study on Application of a Sampling Technique in a particular situation along with its merits-demerits and comparative study with other options.

Programme/Class: **Diploma**	Year: **Second**	**Paper: Third**
Subject: **STATISTICS**		
Course Code: **-B060401T**	Course Title: **Testing of Hypothesis and Applied Statistics**	

Course outcomes:

After completing this course a student will have:

- ✓ Knowledge of the terms like null and alternative hypotheses, two-tailed and one-tailed alternative hypotheses, significant and insignificant, level of significance and confidence, p value etc.
- ✓ Ability to understand the concept of MP, UMP and UMPU tests
- ✓ Ability to understand under what situations one would conduct the small sample and large sample tests (in case of one sample and two sample tests).
- ✓ Familiarity with different aspects of Applied Statistics and their use in real life situations.
- ✓ Ability to understand the concept of Time series along with its different components.
- ✓ Knowledge of Index numbers and their applications along with different types of Index numbers.
- ✓ Familiarity with various demographic methods and different measures of mortality and fertility.
- ✓ Ability to understand the concept of life table and its construction.
- ✓ Knowledge to understand the concept of statistical quality control and different control charts for variables and attributes.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
	Part-A: Testing of Hypothesis and Tests of Significance	
I	Statistical Hypothesis (Simple and Composite), Testing of hypothesis. Type –I and Type – II errors, Significance level, p-values	**08**
II	Power of a test, Definitions of Most Powerful (MP), Uniformly Most Powerful (UMP) and Uniformly Most Powerful Unbiased (UMPU) tests.	**08**
III	Test of significance: Large sample tests for (Attributes and Variables) proportions and means (i) for one sample (ii) for two samples Correlation coefficient in case of (a) $p=p_0$ (b) $p_1=p_2$,	**10**
IV	Small sample test based on t, f and chi-square distributions.	**04**

Part-B: Applied Statistics		
V	Introduction & Definition of Time Series, its different components, illustrations, additive and multiplicative models. Determination of trend by free hand curve, semi average method, moving average method, method of least squares, Analysis of Seasonal Component by Simple average method, Ratio to moving Average Ratio to Trend, Link relative method.	**09**
VI	Index number – its definition, application of index number, price relative and quantity or volume relatives, link and chain relative, problem involved in computation of index number, use of averages, simple aggregative and weighted average method. Laspeyre's, Paasche's and Fisher's index number, time and factor reversal tests of index numbers, consumer price index.	**09**
VII	Vital Statistics: Measurement of Fertility– Crude birth rate, general fertility rate, age-specific birth rate, total fertility rate, gross reproduction rate, net reproduction rate, standardized death rates Complete life table, its main features and construction.	**06**
VII	Introduction to Statistical Quality Control, Process control, tools of statistical quality control, $+3\sigma$ control limits, Principle underlying the construction of control charts. Control charts for variables, 'X' and 'R' charts, construction and interpretation, Control charts for attributes 'p' and 'c' charts, construction and interpretation	**06**

Programme/Class: **B.Sc.**	Year: **Third**	**Paper: First**
Subject: **STATISTICS**		
Course Code:-**B060501T**	Course Title: **Multivariate Analysis and Non-parametric Methods**	

Course outcomes:

After completing this course a student will have:

- ✓ Ability to understand the basic concepts of vector space and matrices in order to study multivariate distribution.
- ✓ Knowledge of the applications of multivariate normal distribution and Maximum Likelihood estimates of mean vector and dispersion matrix.
- ✓ Knowledge of Principal Component Analysis and Factor Analysis.
- ✓ Ability to apply distribution free tests (Non-parametric methods) for one and two sample cases.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
I	Vector Space, Subspace, Linear Combination, Span, Linear Independence, Inner Product, Norm, Orthogonality, Dimension of Vector Space	**08**
II	Row and Column Rank, Rank of Matrix, Elementary operations on Matrices, Inverse of a matrix.	**07**
III	Multivariate Normal Distribution, Marginal and Conditional Distributions, Moment Generating and Characteristics functions	**08**
IV	Maximum Likelihood Estimation of Mean vector and Dispersion matrix, Independence and point sufficiency of these estimates.	**07**
V	Applications of Multivariate Analysis: Principal Components Analysis and Factor Analysis (Application Oriented discussion, derivations not required)	**08**
VI	Multiple and Partial correlations and Multiple Regresions.	**07**
VII	Non-parametric tests, Tests for randomness and test for goodness of fit. One sample tests : Sign test, Wilcoxon Signed rank tests.	**08**
VIII	Two sample tests : Run test, Kolmogorov – Smirnov's test, Median test and Mann-Whitney U test.	**07**

Programme/Class: **B.Sc.**	Year: **Third**	**Paper: Second**
Subject: **STATISTICS**		
Course Code: **-B060502T**	Course Title: **Analysis of Variance and Design of Experiment**	

Course outcomes:

After completing this course a student will have:

- ✓ Knowledge of the concept of Analysis of Variance (ANOVA).
- ✓ Ability to carry out the ANOVA for One way and Two way Classification.
- ✓ Ability to carry out the post-hoc analysis.
- ✓ Knowledge of the concept of Design of experiment and its basic principles.
- ✓ Ability to perform the basic symmetric designs CRD, RBD and LSD with and without missing observations.
- ✓ Knowledge of the concept of factorial experiments and their practical applications.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
I	Defintion of Analysis of Variance, Assumptions and Limitations of ANOVA, One way classification.	**08**
II	Two way classification with equal number of observations per cell. Duncan's multiple comparison tests.	**07**
III	Principles of Design of Experiment: Randomization, Replication and Local Control, Choice of size and type of a plot using uniformity trials. Completely Randomised Design (CRD)	**08**
IV	Randomized Block Design (RBD), Concept and definition of efficiency of design, Comparison of efficiency between CRD and RBD.	**07**
V	Latin Square Design (LSD), Lay-out, ANOVA table, Comparison of efficiencies between LSD and RBD; LSD and CRD	**08**
VI	Missing plot technique: Estimation of missing plots by minimizing error sum of squares in RBD and LSD with one or two missing observations.	**07**
VII	Factorial Experiments: General description of factorial experiments, 2^2, 2^3 and 2^n factorial experiments arranged in RBD and LSD, Definition of Main effects and Interactions in 2^2 and 2^3 factorial experiments,	**08**
VIII	Preparation of ANOVA by Yates procedure, Estimates and tests for main and interaction effects (Analysis without confounding).	**07**

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on allotted Assignment and Class Tests. The marks shall be as follows:

Assessment and Presentation of Assignment	**(05 marks)**
Class Test-I (Objective Questions)	**(04 marks)**
Class Test-II (Descriptive Questions)	**(04 marks)**
Class Test-III (Objective Questions)	**(04 marks)**
Class Test-IV (Descriptive Questions)	**(04 marks)**
Class Interaction	**(04 marks)**

Course prerequisites: To study this course, a student must have had the subject **Mathematics/Elementary Mathematics in class 12th.**

Suggested equivalent online courses:
……..

Further Suggestions:
……..

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

Programme/Class: **B.Sc.**	Year: **Third**	**Paper: Fifth**
Subject: **STATISTICS**		
Course Code: **-B060602T**	Course Title: **Operations Research**	

Course outcomes:

After completing this course a student will have:

- ✓ An idea about the historical background and need of Operations research.
- ✓ Ability to identify and develop operational research models from the verbal description of the real life problems.
- ✓ Knowledge of the mathematical tools that are needed to solve optimization problems.
- ✓ Ability of solving Linear programming problem, Transportation and Assignment problems, Replacement problems, Job sequencing, etc.
- ✓ Ability to solve the problems based on Game Theory.

Credits: **04**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **4-0-0**.

Unit	Topic	No. of Lectures
I	History & background of OR, General linear programming problems and their formulations. Solving LPP by Graphical Method.	**04**
II	Solving LPP by, Simplex method, Big–M method, Two phase Method, Degeneracy and Duality in LPP.	**10**
III	Transportation problem: North-west corner rule, Least cost method, Vogel's approximation method. Optimum solution: Stepping stone method.	**05**
IV	Assignment Problem: Hungarian Method, Travelling Salesman Problem,	**05**
V	Replacement problem: Individual and Group replacement.	**05**
VI	Job sequencing : n jobs – 2 machines, n jobs – k machines, 2 jobs – n machines.	**05**
VII	Game theory: Introduction, Competitive Situations, Characteristics of Competitive Games. Rectangular game, Two-Person Zero-Sum game, minimax-maximin principle, Solution to rectangular game using graphical method	**05**
VIII	Ddominance and modified dominance property to reduce the game matrix and solution to rectangular game with mixed strategy, LPP method.	**06**

PROF. RAJENDRA SINGH (RAJJU BHAIYA) UNIVERSITY, PRAYAGRAJ

Programme/Class: **B.Sc.**	Year: **Third**	**Paper: Sixth**
Subject: **STATISTICS**		
Course Code: **-B060603P**	Course Title: **Operations Research and Statistical Computing Lab**	

Course outcomes:

After completing this course a student will have:

1. Knowledge of mathematical formulation of L.P.P
2. Ability of solving LPP using different methods.
3. Ability to solve Allocation Problem based on Transportation and .Assignment model.
4. Ability to solve problems based on Game Theory.
5. Ability to use programming language R as Calculator.
6. Knowledge of using R in simple data analysis.
7. Able to perform statistical analysis by using SPSS.

Credits: **02**	Core: **Compulsory**
Max. Marks: **25+75**	Min. Passing Marks: **35**

Total No. of Lectures-Tutorials-Practical (in hours per week): **0-0-4**.

	Topic	No. of Lectures
	1. Problem based on Mathematical formulation of L.P.P 2. Problem based on solving LPP using Graphical Method 3. Problem based on solving LPP using Simplex Method 4. Problem based on solving LPP using Charne's Big M method involving artificial variables. 5. Allocation Problem based on Transportation model. 6. Allocation Problem based on Assignment model. 7. Problems based on Game payoff matrix. 8. Problem based on solving Graphical solution to mx2/ 2xn rectangular game. 9. Problem based on solving Mixed strategy game. 10. Problem based on solving game using LPP method. 11. Problem based on application of R as Calculator. 12. Problem based on application of R in simple data analysis 13. Problem based on application of SPSS in data analysis	**60**

Suggested Readings:
As suggested for paper code B060601T and B060602T.

This course can be opted as an elective by the students of following subjects:
Open to ALL

Suggested Continuous Evaluation Methods:

Continuous Internal Evaluation shall be based on Practical File/Record, Class Activities and Overall performance. The marks shall be as follows:

Practical File/Record	**(05 marks)**
Assignment based on B060601T/ B060602T	**(05 marks)**
Case Study based on B060601T/ B060602T	**(10 marks)**
Class Interaction	**(05 marks)**

Suggested Practical Examination Evaluation Methods: (75 Marks)

Practical Examination Evaluation shall be based on Viva-voce and Practical Exercises. The marks shall be as follows:

Practical Exercise (Major%) 01 x 25 Marks	**25 Marks**
Practical Exercise (Minor%) 02 x 15 Marks	**30 Marks**
Viva-voce	**20 Marks**

% There shall be 04-05 Practical Exercises in Examination comprising 01 as Major (Compulsory) and 03-04 as Minor (Students have to attend any 02).

Course prerequisites: To study this course, a student must have opted/passed the **paper code B060601T and B060602T.**
